About Us

Welcome!

Here, you'll find detailed information about our quality range of stairlifts and learn more about the simple process, and thorough aftercare and warranty, that we offer our valued customers here at Senior Stairlifts.

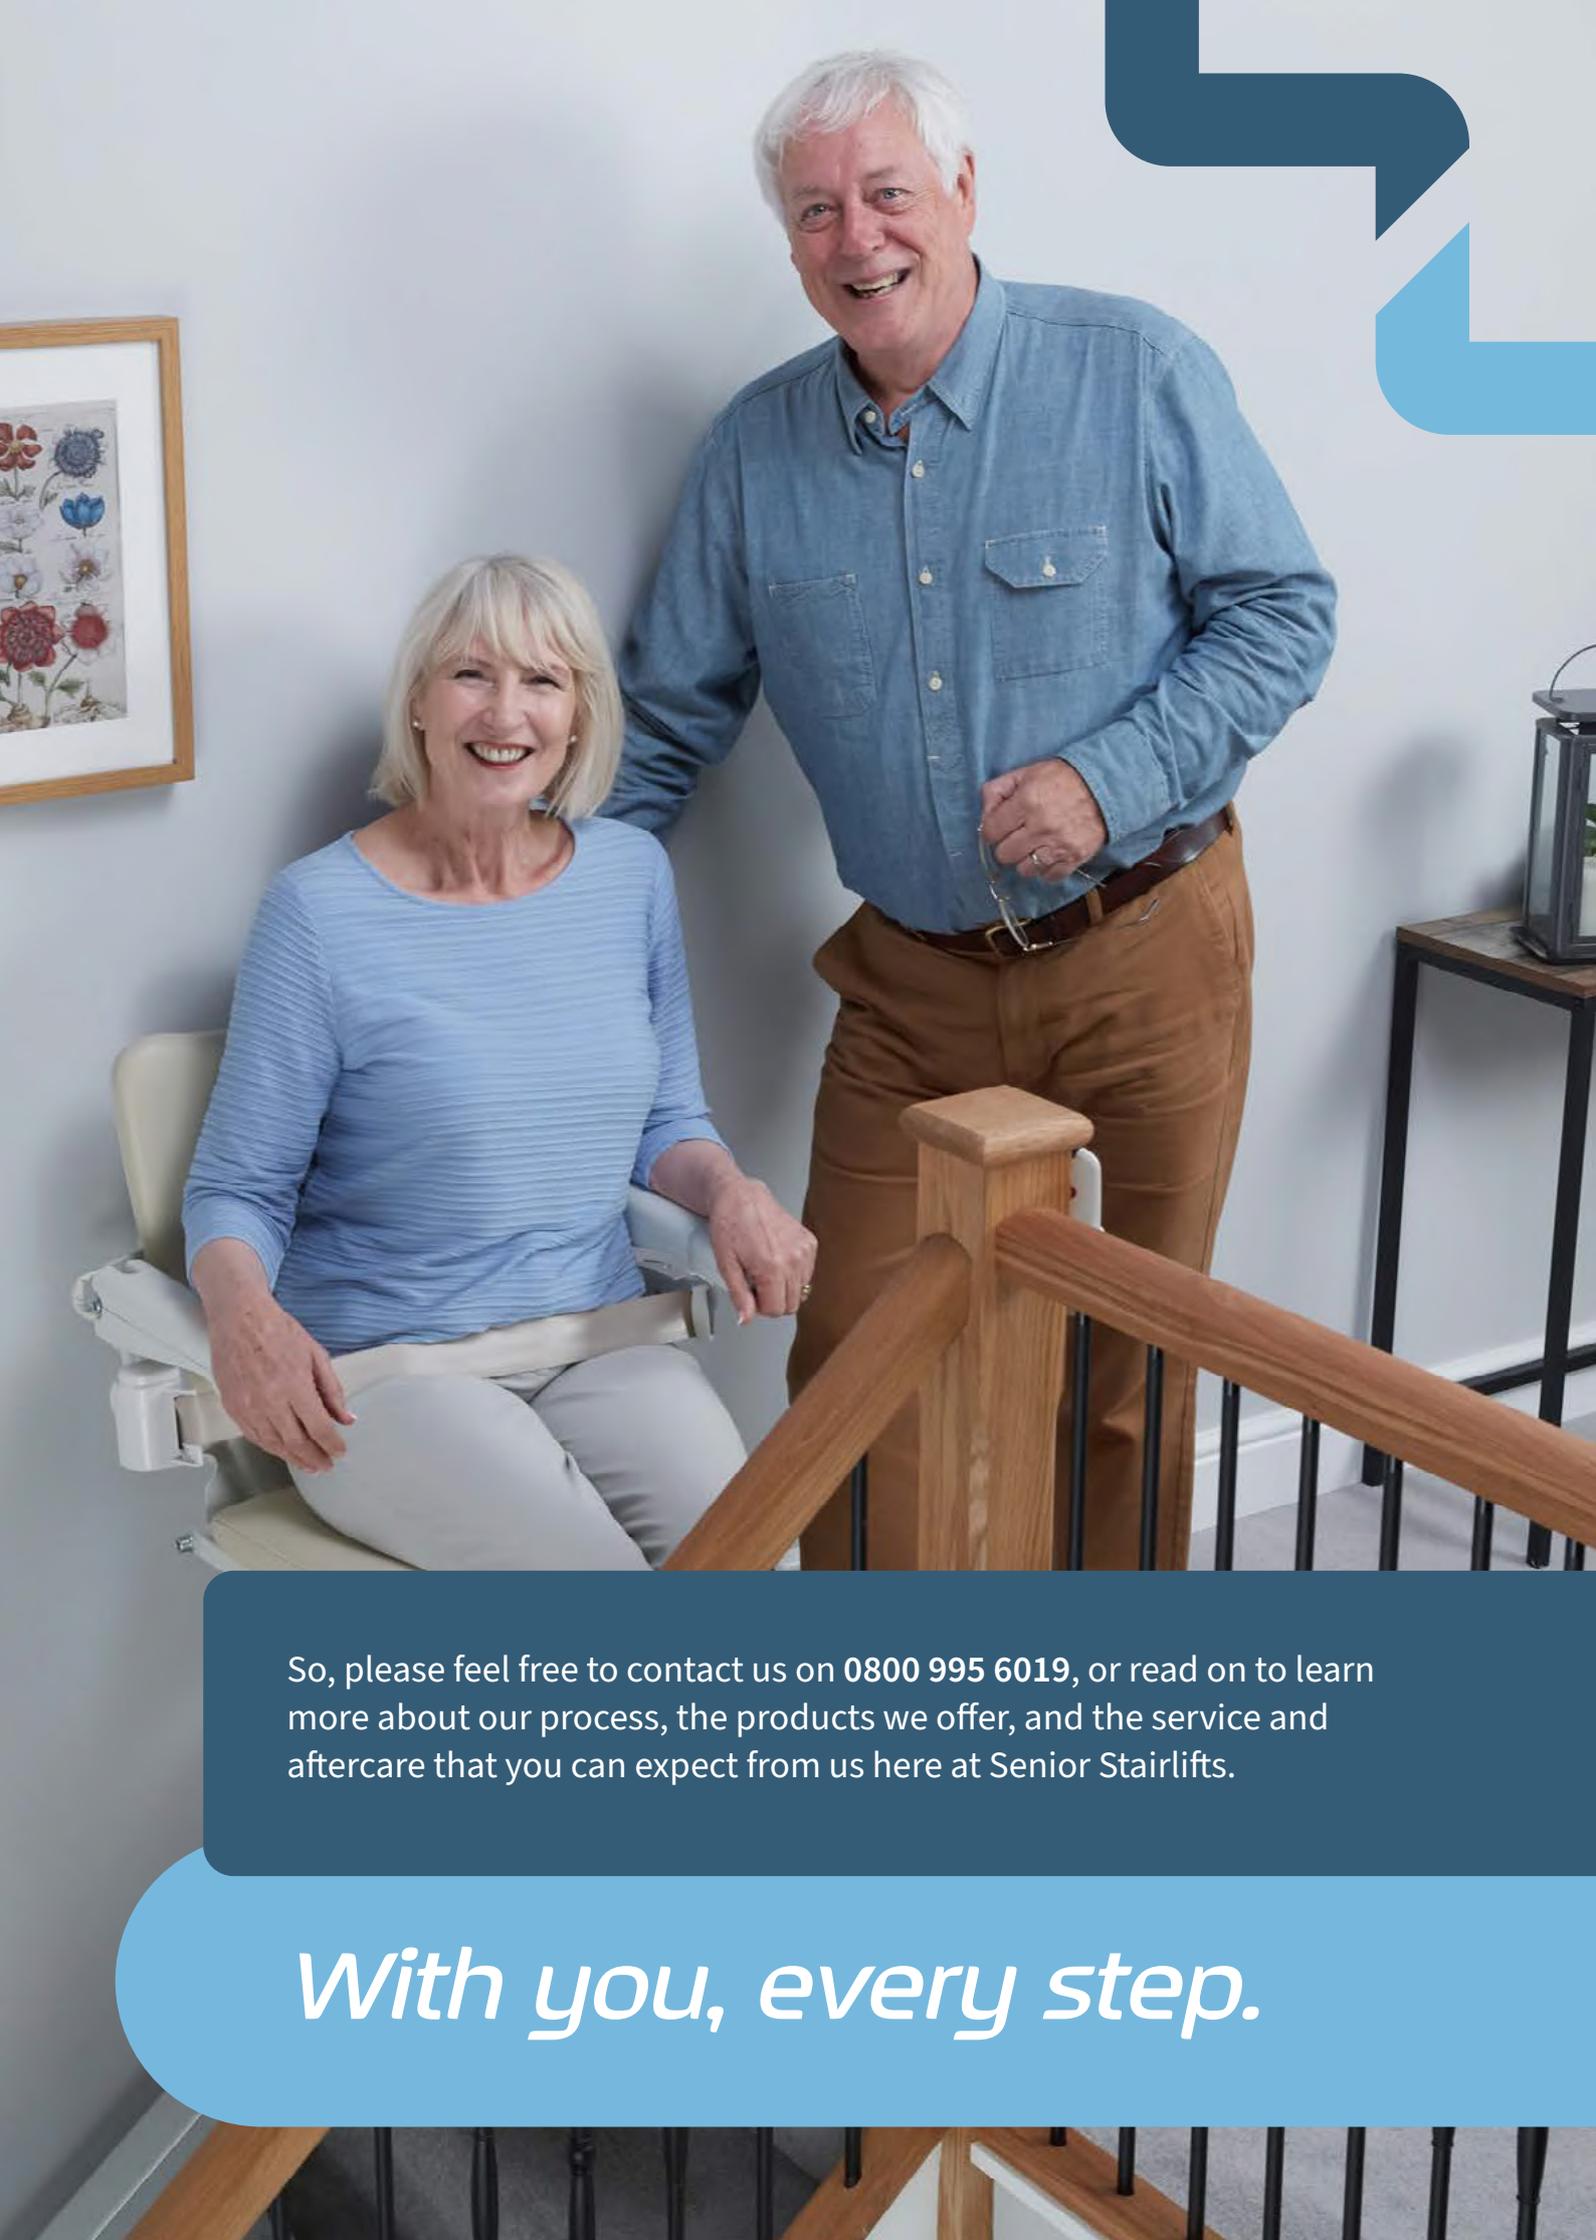

But, before we do that, we thought we'd explain, in a little more detail, who we are and why we do what we do. At **Senior Stairlifts**, our mission is to offer a simple, no-nonsense process that gets the right stairlift for you or a loved one, installed with no fuss or mess. Once installed, you can enjoy peace of mind thanks to our **comprehensive, extendable, 36-month warranty on new models, 24-month warranty on reconditioned units, 24/7 support, and additional service packages.**

Although based in the north-west, we have helped countless people all across the UK, ensuring that they have the right stairlift installed for them. Our comprehensive team means we're never far away, with engineers that are local to you. We're passionate about ensuring that the stairlift installation process is fuss-free and done in good time so that any difficulty to use the stairs disappears.

We only have friendly engineers working for us here at Senior Stairlifts, not salesmen - this means that you're always speaking with experts. From the minute you get in touch to learn more about our product range, right the way through to the super-quick and easy installation process, you'll only ever deal with, and speak to, engineers whose job isn't to rip you off, it's to get things sorted quickly.

Cleanliness, after-care, and high-quality service are all benefits that you can expect to enjoy when you work with us here at Senior Stairlifts. Our team, upon entering your home to install your stairlift, will ensure they leave every surface, bannister, stair, and floor immaculately clean. The only thing our team leaves behind is a fantastic, easy-to-use stairlift.

They will also take the time to make sure you know exactly how to work the stairlift so that you're ready to take advantage of the freedom that it offers from the moment we wave you goodbye.

So, please feel free to contact us on 0800 995 6019, or read on to learn more about our process, the products we offer, and the service and aftercare that you can expect from us here at Senior Stairlifts.

With you, every step.

Step By Step Guide

Here at Senior Stairlifts, we know that, when it comes to stairlifts, you don't want a fussy, overwhelming process that takes too long, involves too many people, and is filled with sales jargon that bewilders, as opposed to assuring you.

We know that you just want a stairlift that's going to make you feel safe and comfortable in your own home - we don't think that's too much to ask.

That's why we've created a 3-step process that gets the stairlift you need in your home, in what will feel like no time at all.

Step 1 - Give us a call!

Once you've read through the brochure, be sure to give us a call on 0800 995 6019. This first step kicks things off and during our chat, we'll discuss your home, what kind of stairlift would be most suited to you, your staircase, and what time is best for our friendly engineers to come round to carry out step 2 - the survey.

Step 2 - Survey

The second step involves an engineer of ours coming round to your house to assess your staircase. This step allows them to come up with a bespoke solution for you, and learn of any unique traits or obstructions that your staircase may have so that we can tailor your stairlift to you. Once we have found the best solution for you and your home, we can provide a quotation on-site.

Step 3 - We Fit Your Stairlift

Once steps one and two are completed, it's time to get on with installing your stairlift. We arrange installation at a time and date to suit you. Once your stairlift has been fitted, we'll take time to clean up after we're done, vacuuming and wiping down surfaces to ensure your hallway, staircase, and surrounding areas are immaculate. Our expert engineer will offer a full product demonstration so you know exactly how to use your new stairlift and will be on hand to answer any questions that you may have.

With You Every Step

Once installed, our team will continue to be there for you long after the stairlift has been fitted. Our 24/7 phone lines, and no-quibble, extendable warranty, are just two of the ways that we ensure our customers can feel comfortable in their homes and use their stairlift for years to come, without worrying about what to do if an issue occurs - all they need to do is ring us on 0800 995 6019.

Straight Stairlifts

The Handicare 1100 is the straight stairlift that we have chosen to supply to our customers. There are plenty of reasons why we think that this product is the ideal choice. The first reason is its slim, unassuming profile that, once installed, fits nice and snug to your wall allowing people to walk up and down the stairs with ease while still allowing you to operate it to its fullest capability.

In addition to its sleek profile, the UK-made 1100 chair folds up neatly allowing for minimal intrusion on the stairway. The Handicare 1100, which we can install quickly, easily, and cleanly, also has one of the slimmest rails on the market which is quiet, and smooth, thanks to its innovative friction system.

Handicare 1100

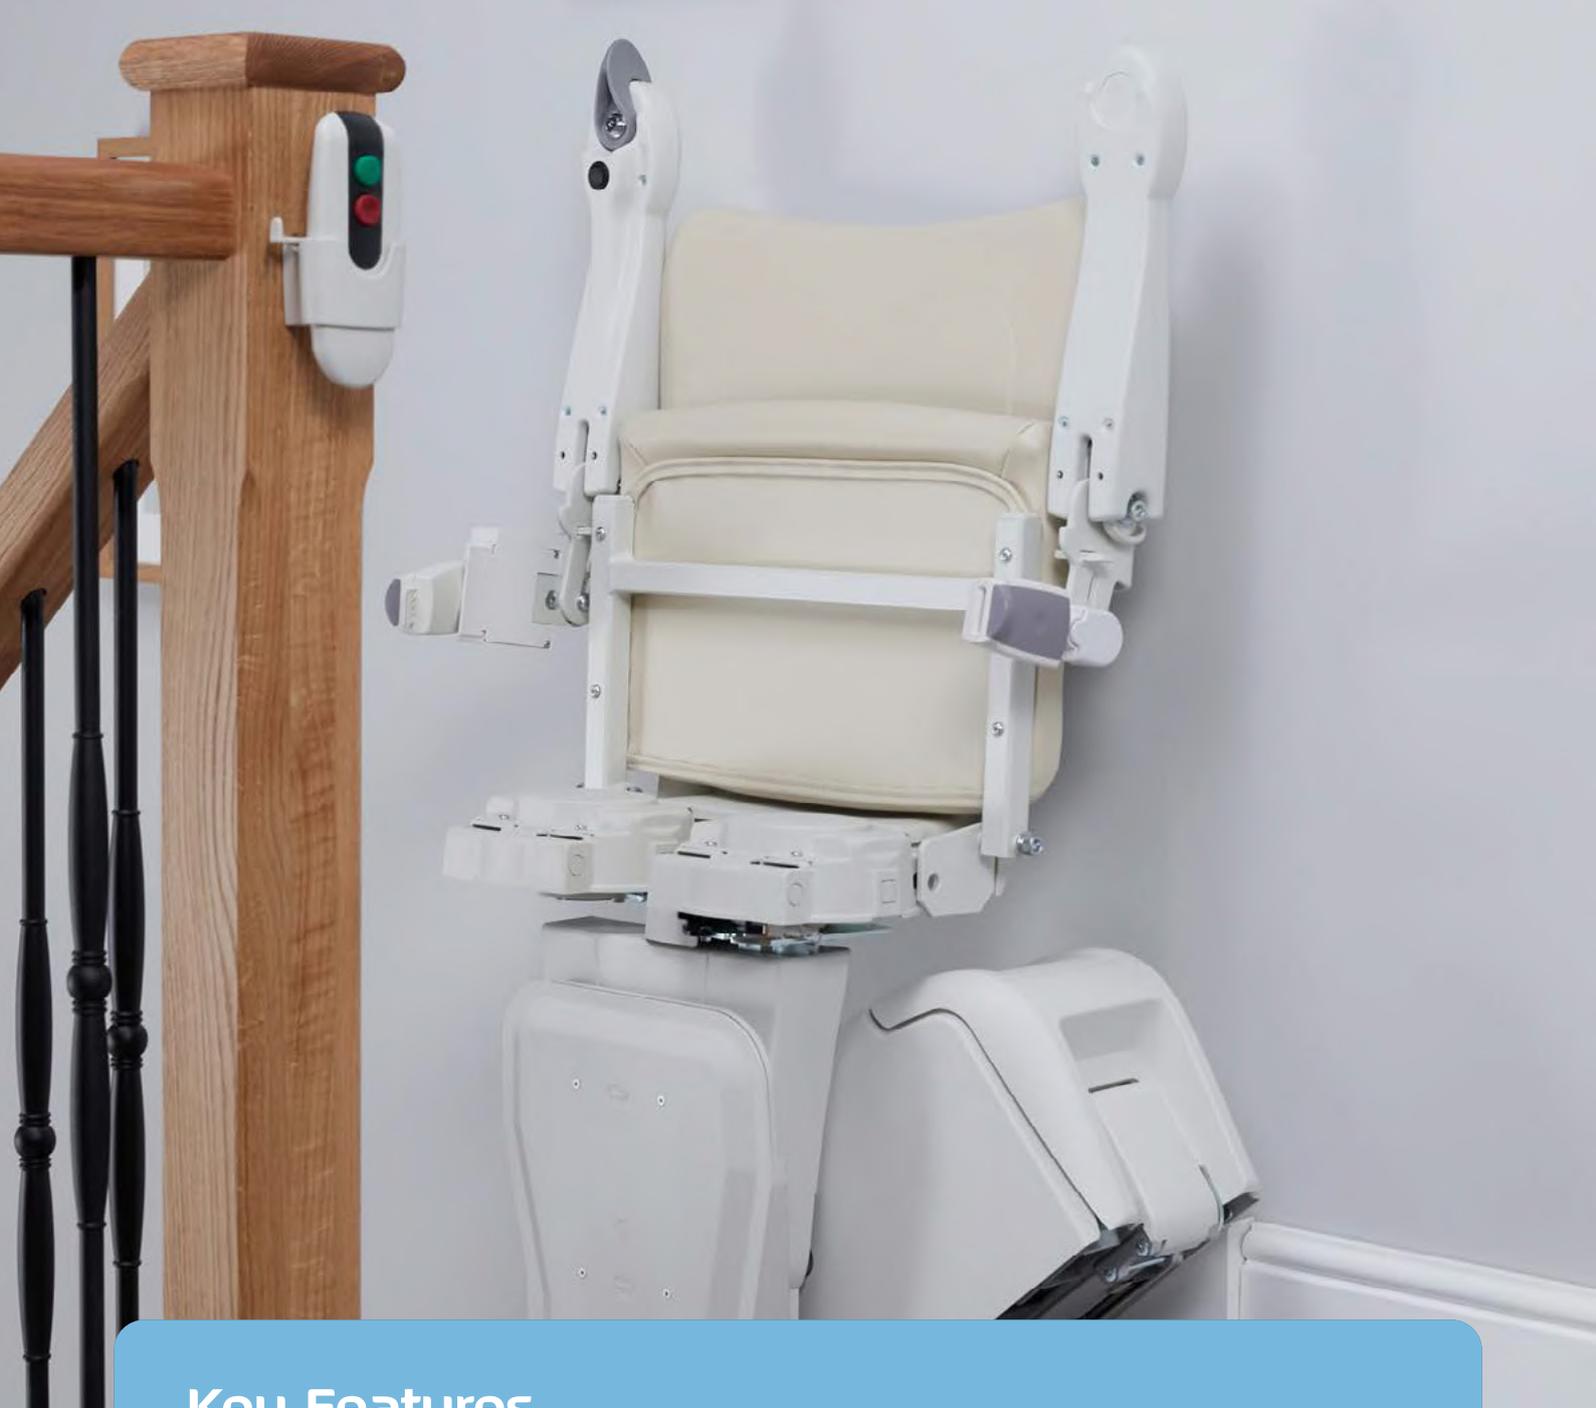

6.

The stairlift also comes with a standard continuous charging function that always keeps the batteries charged no matter where the chair is on the lift - so there is no need to worry about getting stuck! And, in the unlikely event that something does happen, we offer a comprehensive, 36-month warranty on these new stairlifts, which can be extended, as well as 24/7 support and optional servicing packages which can ensure issues are resolved in good time.

We're so used to installing these stairlifts that we can offer bespoke features so that permanent obstructions or safety concerns can be gotten around. We also offer different rail options, such as sliding rails and hinged rails, all of which have unique benefits. And, the best thing about all this? We can install everything within three hours. For more information, call us on 0800 995 6019.

Key Features

- Powered by patented four-wheel drive friction technology and quiet motors.
- Certified to the international stairlift safety standard (EN 81-40).
- An intuitive, user-friendly toggle control that gets you up and down the stairs with ease.
- Save even more space with foldable seats, foot, and armrests.
- Cleverly placed safety sensors that stop the stairlift if it detects an obstruction.

Handicare 1000

If you're looking for a slim, compact stair lift for your straight staircase, then the Handicare 1000 is proof that good things can come in small packages.

Our dedicated team of engineers have had extensive experience working with clients in Leeds, York, Harrogate, Bradford and across the UK - and certainly know their way around fitting a high-quality stairlift on tight, narrow staircases.

The Handicare 1000 is an excellent choice if you're conscious about maintaining space, thanks to a clever aluminium track that doesn't disrupt the flow of your home. This slimline rail - one of the smallest and strongest on the market - is also supplied with two park points as standard, to let you easily charge your battery at the top or bottom of the stairs.

We know safety is incredibly important to you and your family, which is why all of our Handicare stairlifts come with top-range safety features. These include sensors that automatically stop the lift when they come into contact with an obstruction and ultra-reliable internal batteries that continue to run even during a power cut.

The Handicare 1000 features as standard:

- A manual swivel seat
- Unique ergonomically designed toggle switch for ease of use
- Safety sensors
- Powerful internal batteries
- Includes two handheld remote controls, ideal for multiple users
- Upholstery choices available
- Slimline rail with unique solid aluminium cover
- Standard weight limit of 137kg/21.5st

Additional Options:

- Heavy duty motor that can carry up to 160kg/25st
- This model can also be built to accommodate a 200kg/31.5st capacity
- Folding footplate comfortably controlled from arm switch
- Powered swivel seat
- Perch seat for extra support
- Powered or manual hinged rail - this allows the stairlift rail to be folded out of the way to avoid blocking doorways or access at the bottom of the stairs
- Outdoor version available.

Smart XXL Seat

With a capacity of 160kg / 25 st and 200 kg / 31 1/2 st respectively, the Handicare 1000 XL and XXL are our most powerful models

Smart XXL Seat

Smart Perch Seat

Should you have a narrow staircase or problems with your knee or hip joints and cannot sit down, the smart perch seat is the perfect choice for you. The raised set and the reduced seat depth allow you to use the lift in a standing position while being secured by a seatbelt.

The HomeGlide

The HomeGlide stairlift is an ideal choice for those with straight staircases. It features a slim design – for a modern and clean look – and is perfectly complemented by an aluminium rail.

Introducing the HomeGlide Experience

Designed by ergonomic experts, all HomeGlide models feature an ergonomic moulded seat that influences your posture positively while providing maximum comfort during travel.

Glide by name and by design, the HomeGlide boasts superior comfort and value, bringing effortless simplicity to your home. Its soft-

rounded shape and warm grey upholstery are easy on the eye too, making this a perfect fit if you're looking for an unobtrusive mobility aid.

The HomeGlide is operated with an easy-to-use joystick, while remote control handsets allow the lift to park at either the top or bottom of the staircase, depending on what is most convenient for you. Intuitive remote control units are located at the top and bottom of the stairs, allowing you to call your lift and send it to a parking point when not in use.

Unlike other stairlifts, the HomeGlide is fitted onto your staircase rather than your wall, making installation quick, efficient, and minimally disruptive.

The HomeGlide features as standard

- Retractable seat belt
- User-friendly joystick with a soft-touch grip
- Call device
- Foldable to 385mm (15")
- Folding rail & automatically powered hinge
- Can fit straight staircases as narrow as 740mm (29")
- Max. weight capacity 160kg (25 st)
- Fire retardant & liquid repellent upholstery

Additional Packages

The HomeGlide Extra Package

- Powered linked footrest
- Choose from four different seat heights
- Upgrade to a powered swivel seat
- Keylock in case of unauthorised or accidental use

The HomeGlide Outdoor Package

- Weatherproof coating – protects against rain, dust, and direct sunlight
- Keylock in case of unauthorised or accidental use

Curved Stairlifts

Curved staircases give a home character and style. They also provide our engineers with an opportunity to create a bespoke stairlift that will ensure you retain all that character while still being able to move freely around your home. We install and supply the Handicare 4000, which is manufactured in the UK, to homes all across Britain and, as a result, have years of experience coming up with solutions for the most complex of curved staircases.

Your curved stairlift will always be bespoke and purpose-built for you - how do we do this? Well, it begins with our team visiting your property and undergoing a virtual mapping process - we put sensors around key areas of the staircase which then help us create a 3D model of your staircase with the new Handicare 4000 fitted. Our customers love this cutting edge technology as it allows them to see exactly what it is going to look like once we have installed it.

Once we've created the 3D model, we then go ahead and manufacture a rail that is unique to the exact measurements and features of your curved staircase so that, when installation day arrives, our engineers only need around half a day to fit it before you can enjoy the freedom this product offers. The Handicare 4000 also comes in a range of styles and colours, meaning you can select a stairlift that is in keeping with your home's aesthetic.

We offer the Handicare 4000 as new or reconditioned which means people that have different budgets can still afford the benefits of a curved stairlift. We also offer an extendable 36-month warranty on new models, a 24-month warranty on reconditioned Handicare 4000s, as well as 24/7 customer service support, and optional extended warranty and service packages. To learn more, please don't hesitate to call us on 0800 995 6019.

Key Features

- Safety sensors that prevent you from crashing into obstructions.
- Handheld remotes included for multiple users.
- Built-in internal batteries can be used in the event of a power failure.
- Manual swivel seats as standard, though powered versions are available.
- Ergonomic toggle switch designed to be used by all.

The process of purchasing the stair lift was very easy and it was fitted in the time frame given.

The engineer who fitted the stair lift was very polite and helpful and made sure that everything was safe to use before he completed the job.

PAULINE MCOGG

Fantastic service. Mother fell and broke hip and urgently needed stairlift in order to be discharged from hospital. Senior Stairlifts agreed to come out the next day and fitted the stair lift with one working day. Great Service, really friendly office staff and fitter. Would highly recommend.

NICKY BARRY

Handicare Freecurve

Curved staircases are a beautiful and elegant feature in any home, but they can be difficult to use if you're struggling with your mobility. If that's the case, you'll need a powerful and space-efficient stairlift that can navigate even the toughest and smallest of bends - which is where the Handicare Freecurve comes in.

Our team will use cutting edge technology to create a plan of your unique staircase, to ensure your new Handicare stairlift fits the contours of the home perfectly. We'll go the extra mile to get you the best equipment to suit your needs, guaranteeing absolute value for your money.

Handicare Freecurve break-down:

- Pivot seat as standard
- Toggle switch for comfortable and convenient control
- Intelligent safety measures that stop the stairlift when in contact with obstruction
- DC power: enables the stairlift to continue to run for a limited number of trips in the event of a power cut
- Dual controls
- Choice of seats, wipe-clean coverings and rail colours
- Standard weight limit of 125kg/19.5st

Additional options available:

- Electric seats with helpful movement such as active rising and turning at the top of the stairs.
- Footrests that tuck away with the push of a button
- Hinged rail (powered) - this lets you easily conserve space on your stairwell, keeping walkways clear and free of obstructions

Flow X

Flow X is truly a marvel of design, giving confidence back to those with limited mobility. This curved stairlift combines seamless movement, outstanding levels of comfort, and superb craftsmanship. It's the perfect product to boost accessibility to any home.

Introducing the Flow X Experience

With the Flow X's user-friendly and intuitive remote control features, you're always in control.

The stairlift includes a joystick with a comfortable soft-touch grip. For added ease,

The Flow X features as standard

- Automatic chair folding
- Height-adjustable seat and footrest
- Footrest available in 2 sizes (adjustable to 5 positions)
- Seat height adjustable to 4 positions
- 3 different landing options available (standard drop nose, vertical 'short-start' or horizontal overrun)
- Armrest detection and foldable joystick control
- Max. weight capacity up to 125kg (275lbs)
- 2x 12V batteries required for use

the joystick is flexible and can be safely tucked away when not needed. You'll also be equipped with a call device, which allows you to stay connected with up to three different telephone numbers – directly from the stairlift itself – in case of assistance.

Your comfort is important to us. And whilst onboard, you'll find the Advanced Swivel and Levelling (ASL) technology that's integrated into the stairlift to deliver on that.

The unique ASL technology allows the Flow X stairlift to rotate and stay perfectly level while in motion. What's more, its wraparound armrests and one-handed operation seatbelt keep you secure and comfortable.

Designed to blend into your home effortlessly, Flow X is our most space-conscious stairlift. Fitted onto your staircase and not your wall, it can be installed quickly and efficiently, with minimum disruption to your home.

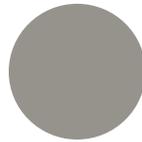

Even if the staircase is awkwardly shaped, the Flow X can be installed closer to the step and on either side of the staircase, making it less obtrusive, while keeping your staircase accessible for other family members to use.

Integrate the Flow X into Your Space

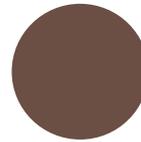

For a seamless fit into your home, choose the right colour for your Flow X:

Devi UP

The Devi UP lift isn't your typical stairlift, it is a technology-forward environmentally-friendly stairlift that seamlessly fits into any interior. This modern stairlift can be used from the comfort of your smartphone, but a remote control is still included for choice.

Introducing the Devi UP Experience

Made from recycled aluminium and no heavy chemicals, the Devi UP's artificial leather upholstery is available in 4 different colours. Its slim design ensures that, once installed, there is still enough space for anyone to use your staircase unobstructed.

The rail system consists of 2 pre-made parts and bends. This ensures that no matter what your staircase looks like, it can be fitted precisely and efficiently. This design allows our experienced engineers to perform quick on-site adjustments to guarantee the perfect fit for your home.

Devi Uplift Features as standard

- Intercom system with WiFi connection
- Automatic swivel chair to help you get on and off the chair safely
- Foldable armrests and footrest
- Remote app with smartphone application
- Remote control
- Automatic hinge rail - choose from a 90° to 180° parking curve
- Landing options - straight, horizontal, or dropnose
- Available for curved and straight stairs
- Max. angle of stairs is 75°
- Max. load 140kg (308 lbs) for straight model
- Max. load 125kg (275 lbs) for curved mode
- 24V DC battery required

Reconditioned Stairlifts

Here at Senior Stairlifts, we're passionate about providing everyone with the stairlift they need to give them their independence, freedom, and access to areas of their property that they've worked hard to enjoy. This passion is why we supply and install reconditioned stairlifts, which are manufactured in the UK, that provide as much robustness and reliability as their newer counterparts, for a fraction of the cost.

We only stock the latest models of stairlifts, and the ones we install have been used for 24 months or less before we recondition them, and deliver them to your home. Just like our new stairlifts, we'll apply the same levels of care and consideration to its installation, and aftercare, so that you'll be able to move up and down your home with ease in no time.

For straight staircases we can offer 24-48 hour turnaround times, from the moment you call us to enquire to the minute our team arrives with the reconditioned unit - this speed of service is matched by very few competitors.

If you're thinking, "This is reconditioned, how can I trust it to operate reliably for years to come?", then have no fear. Our engineers, the same ones that you'll always speak to when dealing with Senior Stairlifts, rigorously test the stairlifts to ensure they meet the same high standards as their newer counterparts.

And, even in the very unlikely event that something were to happen, you can always rely on your 24-month warranty that includes inspections, a no-quibble guarantee, and an option to extend it once it expires. We also offer 24/7 customer support so we can help resolve issues quickly and effectively, as well as optional servicing packages.

Our reconditioned stairlifts are clean, efficient, and extremely popular among our customers, thanks to the wallet-friendly costs, and robust build quality. To learn more about them, their benefits, and why they are just as good as new straight stairlifts,

Give us a call on: **0800 995 6019**

Renting A Stairlift

While permanent stairlifts are ideal for people with long-term mobility issues, sometimes, there are instances where a rented stairlift is needed for a period of time while someone recovers from surgery, an injury, or is looking after a relative who requires one.

At Senior Stairlifts, we're driven to cater for all. This drive is why we offer a stairlift rental service that uses the highest quality reconditioned products that can be quoted on, and installed, in as little as 48 hours, in most cases. This is ideal if life throws you a curveball and you suddenly require the use of a stairlift.

Our expert team of engineers can come into your home and install the stairlift, which has been manufactured in the UK, to the same high standard as those that have been purchased. Once its use has expired, our team will return and dismantle it, leaving little to no trace of a stairlift. Throughout your time with the stairlift, you'll be able to benefit from our 24/7 customer service, and service package, which gets problems resolved promptly.

The flexibility, and option to pick and choose how long you have a product such as this in your home, make the rental service a very popular choice for people who may not feel they need to invest in a permanent stairlift, or just want one for a specific period.

Call a member of our team to rent one today:

0800 995 6019

Servicing And Aftercare

Here at Senior Stairlifts, we think that installing your stairlift is just one part of the process. Once we've installed everything, we then ensure that our team is always there for you, at every step, to offer help and support, should you need it.

We offer a 24/7 customer support service, so if there is an issue in the middle of the night, a member of our team will pick up the phone, register the issue, and ensure that the problem is resolved.

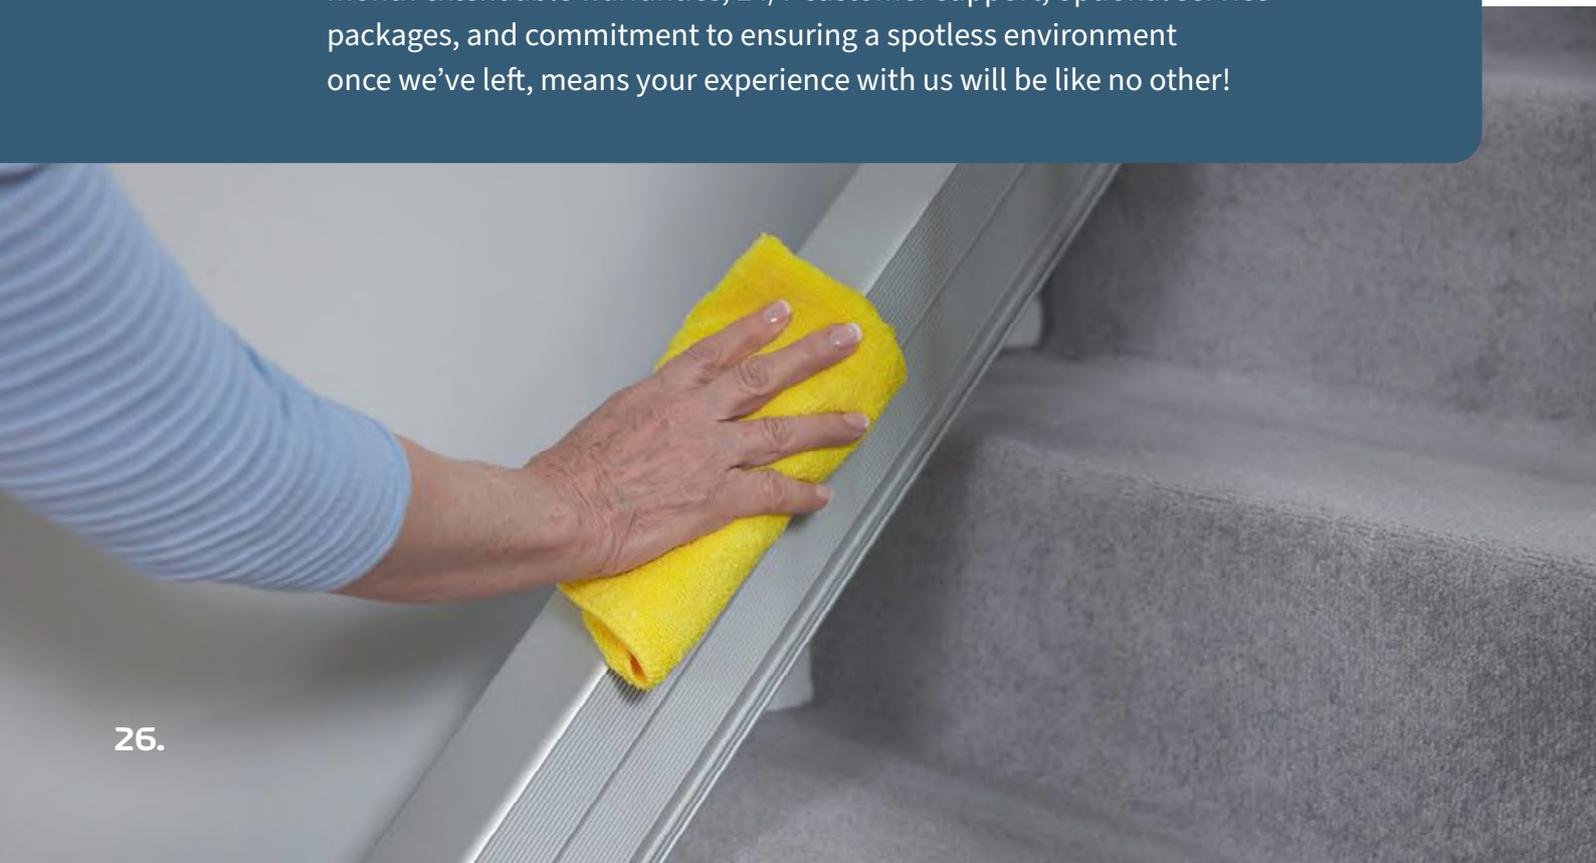

Unlike many stairlift companies, the customer is at the heart of everything we do which is why we're always honest and upfront about costs and requirements.

What does this mean? Well, it means that we offer a clear pricing structure and ensure that your stairlift meets your needs now and in the future.

Speaking of prices, all our prices are fixed and our engineers will never charge more than they initially quoted unless the customer has requested changes. This stability ensures that the price you pay is the price you expect.

With Senior Stairlifts, everything from our quality installation, 24-36 month extendable warranties, 24/7 customer support, optional service packages, and commitment to ensuring a spotless environment once we've left, means your experience with us will be like no other!

With Senior Stairlifts, everything from our quality installation, 24-36 month extendable warranties, 24/7 customer support, optional service packages, and commitment to ensuring a spotless environment once we've left, means your experience with us will be like no other!

If you're after further evidence of our track record and ability to provide a memorable service, why not read one of our online reviews on Google, Yell or on our Facebook page?

"Extremely professional & helpful, confident with advice & service given"- Linda Dixon ★★★★★
